**Safety Data Sheet** 

Copper Bar Alloys (C10100, C10200, C11000)

# Section 1 – Product / Supplier Information

**Product Name** 

875 Yeager Parkway Pelham, AL 35124

**Distributor Information** 

Southern Copper & Supply Company, Inc.

#### Copper Bar Alloys (C10100, C10200, C11000)

Phone: 800-289-2728

Emergency Telephone: 911

#### www.southerncopper.com info@southerncopper.com Section 2 – Hazard Identification

**General Hazard Statement:** Solid copper products are generally classified as "articles" and do not constitute a hazardous materials in solid form under the definitions of the OSHA Hazard Communication Standard (29 CFR 1910.1200). Any articles manufactured from these solid products would be classified as non-hazardous. However some **certain processing** operations may generate dust, mist or fume. **The following information relates to the dust, mist or fumes which may be released during certain processing**.

#### **GHS Classification:**

Hazardous to aquatic environment - Acute Hazard - Category 1 Hazardous to aquatic environment - Chronic Hazard - Category 1

#### GHS LABEL ELEMENTS Symbol(s)

Signal Word Warning

#### **Hazard Statements**

Very toxic to aquatic life Very toxic to aquatic life with long lasting effects

#### **Precautionary Statements**

#### Prevention

Do not breathe dust/fume /mist In case of inadequate ventilation wear respiratory protection Contaminated work clothing should not be allowed out of the workplace. Wash hands thoroughly after handling Wear protective gloves Use personal protective equipment as required Do not eat, drink or smoke when using this product. Avoid release to the environment

Safety Data Sheet Copper Bar Alloys (C10100, C10200, C11000)

### Section 3 – Composition/Information on Ingredients

CAS #	Component	Percent
7440-50-8	Copper	99.9+

# Section 4 – First Aid Measures

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

- **Eyes** Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Keep eye wide open while rinsing. Consult a physician.
- Skin Wash skin with soap and water. In the case of skin irritation or allergic reactions see a physician.
- Ingestion If conscious, give large amounts of water and induce vomiting. Get medical attention.
- **Inhalation** Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Get immediate medical attention.

# **Section 5 – Firefighting Measures**

# This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### **General Fire Hazards**

See Section 9 for Flammability Properties. This product does not present fire or explosion hazards as shipped. Small chips, fines, and dust from processing may be readily ignitable.

#### **Hazardous Combustion Products**

Thermal decomposition can lead to release of irritating gases and vapors. In the event of fire and/or explosion do not breathe fumes. May cause sensitization by inhalation and skin contact.

#### **Extinguishing Media**

Class D extinguishing agents on fines, dust or molten metal. Use coarse water spray on chips and fines.

#### **Unsuitable Extinguishing Media**

DO NOT use halogenated extinguishing agents on small chips or fines. DO NOT use water for fires involving molten metal. These fire extinguishing agents will react with burning material.

#### **Fire Fighting Equipment/Instructions**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

Copper Bar Alloys (C10100, C10200, C11000)

# Section 6 – Accidental Release Measures

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### **Recovery and Neutralization**

Avoid dust formation.

#### Materials and Methods for Clean-Up

Use clean-up methods that avoid dust generation (vacuum wet). Wear a NIOSH approved respirator if dust will be generated in clean-up

#### **Personal Precautions and Protective Equipment**

Wear appropriate protective clothing and respiratory protection for the situation.

#### **Environmental Precautions**

Prevent further leakage or spillage if safe to do so. Prevent product from entering drains. Do not flush into surface water or sanitary sewer system.

#### **Prevention of Secondary Hazards**

None

### Section 7 – Handling and Storage

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### **Handling Procedures**

For dust, fume and mist, avoid contact with skin, eyes and clothing. Wear personal protective equipment. Avoid dust formation. Avoid contact with sharp edges or heated material.

#### **Storage Procedures**

Keep container tightly closed in a dry and well-ventilated place.

#### Incompatibilities

See Section 10

### **Section 8 – Exposure Controls/Personal Protection**

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### **Component Exposure Limits**

Copper (7440-50-8)

ACGIH: 0.2 mg/m<sup>3</sup> TWA (fume) OSHA: 1.0 mg/m<sup>3</sup> TWA (dust, mist, as Cu) 0.1 mg/m<sup>3</sup> TWA (fume) NIOSH: 1 mg/m<sup>3</sup> TWA (dust and mist); 0.1 mg/m<sup>3</sup> TWA (fume)

#### **Engineering Measures**

Where feasible, enclose processes to prevent dust dispersion into the work area. Provide local exhaust when possible, and general ventilation as necessary, to keep airborne concentrations below exposure limits and as low as possible.

Copper Bar Alloys (C10100, C10200, C11000)

#### **Personal Protective Equipment**

#### Respiratory

If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.

#### Hands

Use impervious gloves such as neoprene, nitrile, or rubber for hand protection.

#### Eyes

Wear safety glasses with side shields and/or goggles as necessary to prevent dust from entering eyes.

#### **Skin and Body**

Use body protection appropriate for task.

#### **Hygiene Measures**

Do not breathe dust/fumes/mists. When using, do not eat, drink or smoke. Provide regular cleaning of equipment, work area and clothing. For dust, fumes and mist, avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product. Keep away from food, drink and animal feeding stuffs.

### Section 9 – Physical and Chemical Properties

Appearance:	Reddish yellow	Odor:	None
Physical State:	Solid	pH:	NA
Vapor Pressure:	ND	Vapor Density:	ND
<b>Boiling Point:</b>	ND	Melting Point:	
Solubility (H2O):	Insoluble	Specific Gravity:	$8.94 \text{ g/cm}^{3}$
<b>Evaporation Rate:</b>	ND	VOČ:	ND
Octanol/H <sub>2</sub> O Coeff.:	ND	Flash Point:	NA
Flash Point Method:	NA	Upper Flammability Limit	NA
		(UFL):	
Lower Flammability Limit:	NA	Burning Rate:	NA
(LFL):			
Auto Ignition:	NA		

### Section 10 – Stability and Reactivity

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### **Chemical Stability**

Stable under recommended storage conditions.

#### **Hazardous Reaction Potential**

Will not occur.

#### **Conditions to Avoid**

Dust, fume and mist formation. Heat, flames and sparks.

#### **Incompatible Products**

Acetylene, strong acids, strong oxidizing agents, chlorine, fused ammonium nitrate, nitrosyl fluoride, iodine pentafluoride

Safety Data Sheet

Copper Bar Alloys (C10100, C10200, C11000)

#### **Hazardous Decomposition Products**

Copper oxide

# Section 11 – Toxicological Information

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### Acute Toxicity

#### **Component Analysis - LD50/LC50**

NA

#### Skin

Contact with dust can cause mechanical irritation of the skin. Prolonged skin contact may defat the skin and produce dermatitis. Repeated or prolonged skin contact may cause allergic reactions with susceptible persons. Copper exposure may results in complications for those individuals with Wilson's disease.

#### Eye

Dust contact with the eyes can lead to mechanical irritation.

#### Ingestion

May irritate stomach if swallowed.

#### Inhalation

Inhalation of dust in high concentration may cause irritation of respiratory system.

#### **Respiratory Organs Sensitization/Skin Sensitization**

May cause an allergic skin reaction

#### **Generative Cell Mutagenicity**

NA

Carcinogenicity A: General Product Information NA

B: Component Carcinogenicity NA

**Reproductive Toxicity** NA

- Specified Target Organ General Toxicity: Single Exposure  $_{\rm NA}$
- Specified Target Organ General Toxicity: Repeated Exposure NA

# **Safety Data Sheet**

Copper Bar Alloys (C10100, C10200, C11000)

#### **Aspiration Respiratory Organs Hazard**

NA

### **Section 12 – Ecological Information**

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### Ecotoxicity

#### **A: General Product Information**

Copper powder is very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

### B: Component Analysis - Ecotoxicity - Aquatic Toxicity

Copper (7440-50-8)

Test & Species	Conditions
96 Hr LC50 Pimephales promelas	0.0068 - 0.0156 mg/L
96 Hr LC50 Pimephales promelas	<0.3 mg/L [static]
96 Hr LC50 Pimephales promelas	0.2 mg/L
96 Hr LC50 Oncorhynchus mykiss	[flow- 0.052 mg/L
96 Hr LC50 Lepomis macrochirus	[flow- through] 1.25 mg/L [static]
96 Hr LC50 Cyprinus carpio	0.3 mg/L
96 Hr LC50 Cyprinus carpio	[semi- static] 0.8 mg/L [static]
96 Hr LC50 Poecilia reticulata	0.112 mg/L
72 Hr EC50 Pseudokirchneriella subcapitata 96 Hr EC50 Pseudokirchneriella subcapitata 48 Hr EC50 Daphnia magna	[flow- through] 0.0426 - 0.0535 mg/L [static] 0.031 - 0.054 mg/L [static] 0.03 mg/L [Static]

#### Persistence/Degradability

Metal powders may cause ecological damage through silting or sedimentation effect in water depriving organisms of habitat and mobility, and/or fouling of gills, lungs and skin thus limiting oxygen uptake.

#### Bioaccumulation

Metal powders in water or soil may form metal oxides or other metal compounds that could become bioavailable and harm aquatic or terrestrial organisms.

#### **Mobility in Soil**

Metal powder would be relatively immobile in soils but some metal compounds may be transported with ground water.

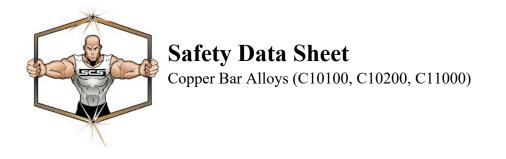

# Section 13 – Disposal Considerations

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### Waste Disposal Instructions

See Section 7 for Handling Procedures.

See Section 8 for Personal Protective Equipment recommendations.

#### **Disposal of Contaminated Containers or Packaging**

Dispose of in accordance with federal, state and local regulations

### **Section 14 – Transport Information**

This information relates to the dust, mist or fumes which may be released during certain processing (See Section 2)

#### **Component Marine Pollutants**

This material contains one or more of the following chemicals required by US DOT to be identified as marine pollutants.

Component	CAS #	
Copper	7440-50-8	DOT regulated severe marine
		pollutant (powder)

#### **DOT Information**

Shipping Name: Not Regulated

#### **IATA Information**

Shipping Name: Not Regulated

#### **ICAO Information**

Shipping Name: Not Regulated

#### **IMDG Information**

Shipping Name: Not Regulated

### **Section 15 – Regulatory Information**

#### **Regulatory Information**

#### **A: Component Analysis**

This material contains one or more of the following chemicals required to be identified under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65) and/or CERCLA (40 CFR 302.4).

#### Copper (7440-50-8)

SARA 313: 1.0 % de minimis concentration

CERCLA: 5000 lb final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is >100 µm);

#### **B:** Component Marine Pollutants

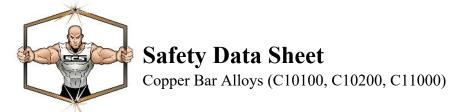

This material contains one or more of the following chemicals required by US DOT to be identified as marine pollutants.

Copper (7440-50-8)

55-96 DOT regulated severe marine pollutant (powder)

#### **State Regulations**

#### A: Component Analysis - State

The following components appear on one or more of the following state hazardous substances lists:

Component	CAS	CA	MA	MN	NJ	PA	RI
Copper	7440-50-8	Yes	Yes	Yes	Yes	Yes	Yes

#### **Component Analysis - WHMIS IDL**

The following components are identified under the Canadian Hazardous Products Act Ingredient Disclosure List:

Component	CAS #	Minimum Concentration
Copper	7440-50-8	1 %

#### **Additional Regulatory Information**

#### **Component Analysis - Inventory**

Component	CAS #	TSCA	CAN	EEC
Copper	7440-50-8	Yes	DSL	EINECS

### **Section 16 - Other Information**

#### Key/Legend

ACGIH = American Conference of Governmental Industrial Hygienists; DOT = Department of Transportation; DSL = Domestic Substances List; EEC = European Economic Community; EINECS = European Inventory of Existing Commercial Chemical Substances; EU = European Union; IARC = International Agency for Research on Cancer; IMO = International Maritime Organization; IATA = International Air Transport Association; NDSL = Non-Domestic Substances List; NTP = National Toxicology Program; TLV = Threshold Limit Value; TWA = Time Weighted Average; NIOSH = National Institute of Occupational Safety and Health; OSHA = Occupational Safety and Health Administration; IMDG = International Maritime Dangerous Goods Code; IATA = International Air Transport Association

### **Employer Responsibilities**

Employers must ensure that the SDSs are readily accessible to employees for all hazardous chemicals in their workplace. This may be done in many ways. For example, employers may keep the SDSs in a binder or on computers as long as the employees have immediate access to the information without leaving their work area when needed and a back-up is available for rapid access to the SDS in the case of a power outage or other emergency. Furthermore, employers may want to designate a person(s) responsible for obtaining and maintaining the SDSs. If the employer does not have an SDS, the employer or designated person(s) should contact the manufacturer to obtain one.

This is a true copy of the information supplied to Southern Copper from the manufacturing companies for which we distribute their material and the regulations set forth by the United States Department of Labor from which this SDS template was created from: https://www.osha.gov/Publications/OSHA3514.html#footnote1
