

## **Southern Copper & Supply Company, Inc. REACH Conformance Statement**

**Date:** April 21, 2025

Southern Copper & Supply Company, Inc. ("SCS") is committed to ensuring the safety, health, and environmental responsibility of the materials we distribute. In accordance with the European Union's REACH Regulation (Registration, Evaluation, Authorization, and Restriction of Chemicals – EC No. 1907/2006), we confirm our ongoing compliance obligations and provide the following declaration:

### **Product Classification and REACH Scope:**

The products supplied by SCS, including copper and copper-alloy plate, bar, rod, and related forms, are classified as "**Articles**" under the REACH directive. These products do not release substances under normal and foreseeable conditions of use and are therefore not subject to substance registration requirements under REACH.

In accordance with Regulation (EC) No. 1272/2008 on classification, labeling, and packaging of substances and mixtures (CLP/GHS), copper and copper alloys in solid form are not considered substances or mixtures.

### **Substances of Very High Concern (SVHC):**

SCS has evaluated its products against the most recent version of the REACH Candidate List – **REACH 247 (January 2025)** – which includes the latest SVHC additions published by the European Chemicals Agency (ECHA).

At this time, none of the articles distributed by SCS contain any SVHCs listed in REACH 247 in concentrations greater than the 0.1% weight threshold as defined under Article 33 of REACH. These include, but are not limited to:

- **Triphenyl phosphate** (added November 2024 – endocrine-disrupting flame retardant)
- **Bis(α,α-dimethylbenzyl) peroxide** (added June 2024 – reproductive toxin)

These substances are **not intentionally used or present** in SCS's copper-based articles.

### **Ongoing Compliance:**

Southern Copper & Supply Company, Inc. continuously monitors updates to the REACH Candidate List and will notify customers if any distributed product is found to exceed the 0.1% SVHC threshold in the future. Upon request, SCS can provide compliance declarations or product-specific documentation as needed.

Sincerely,

A handwritten signature in black ink, appearing to read "Scott Johnson", is written over a horizontal line.
